ABDALHADI QASEM AL TAYASNEH

COMPUTER ENGINEERING STUDENT | EMBEDDED SYSTEMS | FULL-STACK DEVELOPMENT

Damascus, Syria | +963 946 150 461 | teahade854@gmail.com | GitHub: github.com/Hade461

PROFESSIONAL SUMMARY

Fourth-year Computer Engineering student at Damascus University with a foundation in embedded systems, digital logic, and software development. Hands-on academic project experience with Arduino, AVR microcontrollers, MATLAB, Proteus, and C++. Also building full-stack web development skills with HTML, CSS, JavaScript, React, Next.js, Supabase, and REST APIs. Interested in practical engineering projects and developing useful, user-focused software.

EDUCATION

B.Sc. in Computer Engineering — In Progress

Damascus University, Faculty of Mechanical and Electrical Engineering | Fourth-year student

SELECTED PROJECTS

Dual-Axis Solar Tracking System
Arduino · MATLAB · Servo Control · Light Sensors

- Developed an automated solar-tracking system designed to orient a solar panel toward stronger sunlight.
- Integrated Arduino hardware with MATLAB for data acquisition, processing, and real-time servo control based on light-sensor inputs.

TECHNICAL SKILLS

Programming: C++, Embedded C, 8086 Assembly, JavaScript, HTML, CSS

Web & APIs: React, Next.js, Supabase, REST APIs, responsive web design, Git, GitHub

Embedded & Engineering Tools: Arduino, MATLAB, Proteus, Microchip Studio, Multisim, Xilinx Vivado, Maple, Polyspace

Core Areas: Embedded systems, digital logic design, microcontrollers, full-stack web development, AI-assisted development

CERTIFICATIONS

Fullstack Development with AI — SharafAI | September 2026

LANGUAGES

Arabic (Native) | English (Elementary; currently improving)
